## Mercer Hacks

### Hosted by the WW-P Education Foundation and Computer Science Remastered

Dear Sir/Madam,

The West Windsor-Plainsboro Education Foundation is proud to partner with Computer Science Remastered (CSR), a global computer science mentorship 501(c)(3) nonprofit organization to host our first Virtual Hackathon! The virtual event will be held April 23-25th.

All 8th-12th grade students from West Windsor-Plainsboro and neighboring townships are eligible to participate in the hackathon, while all students 6th grade and above will be able to attend the seminars and participate in the hosted activities. The goal of this event is to challenge students' coding abilities, encourage collaboration, inspire strategic thinking, and create innovative technologies to solve real world issues in a 48 hour time frame - a fun yet challenging task, something perfect for the youth. Students will also have the opportunity to participate in several workshops, meet our sponsors, and have a chance to win monetary prizes through their creativity and innovation.

The WW-P Education Foundation is a 501(c)(3) non-profit charitable organization that supports excellence in all ten schools in West Windsor-Plainsboro school district through the funding of teacher grants, innovative programs, and strategic initiatives. We seek your support for this hackathon by considering one of the sponsorship opportunities listed below. With your support, our students will get to experience something new, enriching, and challenging, all while having fun with friends. We will proudly acknowledge your support on the varying levels depending on the package you choose.

Thank you for your consideration and we look forward to your participation.

Sincerely,

*Ashima Saksena*

# General Information:

## **Mercer Hacks Presented by WW-P Education Foundation and Computer Science Remastered**

### **How we make a difference:**

With the exceptional support from our donors and supporters, the West Windsor-Plainsboro Education Foundation continues to support district teachers and students to meet the growing challenges faced during the COVID-19 crisis. During the pandemic, Foundation gave grants to teachers for digital microscopes that enabled students to see live science projected on their computer screens at home; awarded funds towards equipment purchase for teachers, independent student learning desks, sensory stations for elementary school students, and digital books, to name a few. A complete list of grants and programs supported are available on our website, <https://wwpeducationfoundation.org/>. Furthermore, CSR has run similar events relating to coding for over 3 years and has been teaching children, underprivileged and privileged, how to code because it is CSR's firm belief that coding is the future of society. They have 6 chapters worldwide, from Ohio and California to India and China, and are working to create more, all in an effort to educate the youth (more info can be found in the following link: <https://csremastered.org/>). They currently teach over 350 students with more than 300 dedicated volunteers. With CSR's and WW-P Education Foundation's joint efforts in this Hackathon, there is little doubt about the success of the event or the benefits that can be enjoyed by its sponsors.

**Mercer Hacks Date:** April 23-25, 2021

### **Demographics:**

- The Hackathon will draw students from middle and high schools
- Event will be marketed through a website, social media, and email blasts

**Registration link:** <https://forms.gle/p6PtXWBzmpzTvtEo7>

### **Eligibility Requirements :**

Grades 8 and above for hackathon

Grades 6 and above for seminars and workshop

### **Workshops/Seminars/Activities Offered :**

- Intro to Programming
- Intro to Machine Learning
- Unplugged: Creative Problem Solving
- Scribble.io
- Among-Us game event
- Graphic Design Masterclass
- Sponsors may host their own workshops with their own softwares. More information is provided in the categories below.

**Prizes\*** Offered: Various prizes will be rewarded such as Best Overall Project, Most Creative, Best Wellness/Health Hack, Best Business/Economics Hack, Funniest Project and more

**\*Sponsors of this event may give their own predetermined prizes for whoever utilizes their service the best**
